

PROJECT NAME: Camp Consonant-Individualized Reading Remediation

RECIPIENT: Waterford Institute

LOCATION: Salt Lake City, Utah

PURPOSE: Funding is being sought to develop a dynamic sequence engine for Camp consonant, an animated, web-centric, cost-efficient software tutoring curriculum. This sequencer will make Camp consonant available to children who do not have access to tutoring either because of distances or expense. The program will be a technological innovation that will potentially revolutionize education by using education designer specifications and child-user input to individualize instruction and can be delivered world-wide through the internet.

AMOUNT: \$200,000
